## British Columbia Regional Turf Spray Program

### Greens – Cool Season

With this geography-specific spray program, superintendents have a customized rotation management plan for disease control. Be sure and include these important rotations in your plan and have strong, resilient turf all year long.

- Intrinsic® brand fungicides, like Lexicon®, Honor® and Insignia® Pro, provide effective disease control and **Plant Health Benefits\***, including stronger, deeper roots and higher stress tolerance
- New Lexicon fungicide is a powerhouse broad-spectrum, dual active fungicide providing proven protection against patch diseases, anthracnose, dollar spot and microdochium patch
- Insignia Pro fungicide combines two trusted active ingredients for long-lasting snow mold control
- Maxtima® fungicide delivers long-lasting disease control of key diseases at any temperature for flexibility and year-round confidence
- Xzemplar® fungicide offers the broadest spectrum control of any SDHI available in Canada, protecting against dollar spot, microdochium patch, summer patch, brown ring patch and leaf spot

\* **Plant Health Benefits** refer to products that contain the active ingredient pyraclostrobin.

## British Columbia Region

This area features moderate temperatures and variable rainfall, with spring and fall being the wettest seasons. Disease pressure is highest in coastal and valley areas where humidity and nighttime temperatures provide ideal conditions for patch diseases like brown ring patch and summer patch. Fairy ring, anthracnose, fusarium patch and snow mold are also common on this region's cool season greens, tees and fairways.
